

Rorn Hangsovoleak

I am an Information Technology Engineering student with a focus on **Software Engineering** and **Web Development**. I am a highly motivated, reliable and hardworking individual seeking a dynamic working environment with challenge to develop my skills. My ultimate career goal is to become a fully qualified and experienced IT professional.

Work Experience

Volunteer Program: Tech for Kids Academy

Technical

May - August 2025

- **Setup and configuration:** Installing and configuring technical equipment such as sound systems, microphones and screens.
- **Operation and management:** Operate the equipment during events to ensure everything runs smoothly and effectively.
- **Troubleshooting:** Quickly identifying and fix any technical problems.
- **Disassembly:** Taking down and packing up all equipment after the event is over.

Setup Computer

October - Present

- Boot and activate Windows on laptop and desktop.
- Clean laptop and desktops, including checking RAM and battery power.
- Fix errors that occur when Windows is booting.
- Find information on how to install or set up Windows using a USB, so the laptop runs smoothly and safely without bugs.
- Find resources that can help high school students learn and understand how technology works.
- Check all parts of the laptop to make sure everything works properly and safely for student to use.
