

Rorn Hangsovoleak

I am a Information Technology Engineering student specializing in **Software Developer**. Experienced in building web applications using modern frontend and backend technologies. Strong foundation in programming, system troubleshooting, and problem solving. Eager to contribute technical skills while continuing to grow.

Work Experience

Volunteer Program: Tech for Kids Academy

Role: Technical

May - August 2025

- **Setup and configuration:** Installing and configuring technical equipment such as sound systems, microphones and screens.
- **Operation and management:** Operate the equipment during events to ensure everything runs smoothly and effectively.

Role: IT Support Technician

October 2025 - January 2026

- Boot and activate Windows on laptop and desktop.
- Clean laptop and desktops, including checking RAM and battery power.
- Fix errors that occur when Windows is booting.
- Find information and reference on how to install or set up Windows using a USB, so the laptop runs smoothly and safely without bugs.

Projects

CRUD-System

- Developed a CRUD-based system with a well-structured codebase.
- Collaborated with team members to design the program workflow using flowcharts.
- Practiced clean code principles and participated in team discussions to improve the system structure and problem-solving process.

Donation Platform Cambodia using React (html - css - javaScript)

- Designed and implemented backend APIs to retrieve and manage data from the database.
- Contributed to the overall project structure and system workflow.
- Collaborated with team members using GitHub for version control and code integration.
- Participated in discussions to identify effective solutions during development.

Portfolio using React - Node ExpressJs - postgresSQL

- Designed and implemented the project structure for a personal portfolio system.
- Developed a dashboard with full CRUD functionality (Create, Read, Update, Delete).

Educational Background

Bachelor of Information Technology Engineering

Royal University of Phnom Penh

February - Present (Year 2)

Associate of App/Web Development

Tux Global Institute

February - Present (Year 2)

Contact

Address: Psa Terk Tla Village, Tuek Thla Commune, Sen Sok District, Phnom Penh 120802

Phone: 093 303 606

Skills

Programming

- Java, C++, JavaScript

Tools:

- Visual Studio Code
- Antigravity
- Figma

Database:

- MySQL, PostgreSQL, SQL Server

Version Control:

- GitHub

Web Technologies:

- HTML, CSS, Tailwind, JavaScript, React

Languages

- Khmer (Native)
- English (Pre-Intermediate)

Certification

- RISE by Tech for Kids Academy
- Computer of Change

Additional Information

- Relevant skills, certifications, volunteer work, projects and languages to showcase skills and experience beyond formal education.
